We are still processing your request concerning information on the Phoenix Program in South Vietnam. In the course of searching for material on the program, I came across the enclosed monograph, a fairly complete description of the program, which was declassified for the Calley trial, I believe, and has been previously given to the media. I am enclosing a copy for your retention, without charge.

There is also a somewhat longer and more personal articlealso unclassified--entitled "The Phoenix Program; a Postmortem," which was written by Ensign F. C. Brown, MSC, USN, for publication in Military Intelligence magazine. It is either in a recent issue, or soon will be, and I recommend that you write them for reprints of the article. Military Intelligence is published by the U.S. Army Intelligence Center and School, P.O. Box 2603, Ft. Huachuca, Arizona 85163.

He have also found a considerable number of intelligence documents. These have not as yet been reviewed for release, but all are highly classified, and if released at all would be in a most fragmentary state. In the hope that the above two articles will prove sufficient for your needs and that we can together save the taxpager a considerable amount of money in manpower costs, I will hold any further review until I hear from you.

	Sincerely.
